

## LPN Refresher Series Outline

The LPN refresher series is a series of three courses. These three courses will meet the requirements of the Wisconsin State Board of Nursing to activate a license that is inactive but it will not meet the requirement of any disciplinary action required by the Board of Nursing. Please verify your status with the Board of Nursing. Each State Board of Nursing may have slightly different requirements so if you live outside of Wisconsin please check with your state's Board of Nursing prior to enrollment. You may also consider this series if you are returning to practice after a long absence or to upgrade your skills.

The first course of the series, LPN Refresher Theory - 10-543-150, is a theory based course that focuses on diseases, signs and symptoms, new medications and treatments and potential complications. A student is expected to complete assigned readings and worksheets which are then submitted to the instructor. There is a final exam that must be proctored. This may be mailed to an institution near your home, possibly a college or a public library. Additional notes:

- An inactive Licensed Practical Nurse license or individual permission.
- Students living within the state of Wisconsin will be accepted to this course.
- Independent Study - About 36 hours
- No trips to campus
- 2 Credits

The second course, LPN Skills Refresher – 10-543-151, is a lab based course. The student is expected to read and prepare for lab assignments at home. However, unlike the theory course, several trips to campus are required to practice and test-out in our college skills lab. Open lab times vary and appointments are coordinated with our instructor and scheduled ahead of time.

- Prerequisite is completion of LPN Refresher Theory.
- Students **must live** within the MSTC district to be considered for this course.
- About 20 hours of lab and 36 hours of reading and prep. Lab practice and faculty check-off of performance.
- 2 Credits

The third course, LPN Precepted Clinical Nursing Refresher – 10-543-152, is a precepted clinical course that is conducted in long term care facility and is within MSTC's district. The instructor and the student mutually decide where, within MSTC district, this preceptorship will be held.

- Prerequisite is completion of LPN Refresher Theory and LPN Skills Refresher.
- Students **must live** within the MSTC district to be considered for this course.
- 72 hours of precepted clinical and 36 hours of preparation, orientation and debriefing.
- 2 Credits

**Students have two years to complete the entire series of three courses. If more than one year has lapsed between any of the three courses you may be subject to repeating the prior course.**
