

Dear Prospective Student,

Thank you for your inquiry about our Nursing Refresher series at Mid-State Technical College. The RN and LPN Refresher Series is a series of three courses. The first course is a theory based course that focuses on diseases, signs and symptoms, new medications and treatments and potential complications. The second course is a lab based course which is held in our skills lab. The third course is a Precepted Clinical course held within Mid-State Technical College's district.

MSTC offers the RN and LPN Refresher Theory courses to anyone residing within the state of Wisconsin. The second two courses of the RN and LPN Refresher Series, **skills and clinical, are offered only to students residing within the MSTC district.** The entire series of three courses must be completed within two years.

These three courses will meet the requirements of the Wisconsin State Board of Nursing to activate a license that is inactive but it will not meet the requirement of any disciplinary action required by the Board of Nursing. Please verify your status with the Board of Nursing. Each State Board of Nursing may have slightly different requirements therefore; if you live outside of Wisconsin please check with your state's Board of Nursing prior to enrollment.

Please feel free to access the MSTC college website for complete information concerning our Nursing Refresher Series including:
