

**Policy Title: GLOBAL EDUCATION**

Mid-State Technical College recognizes that the College and the District it serves exist in an interrelated world community. It is important, therefore, that the social, political, cultural, and economic dimensions of this global environment are reflected in its programs and services as appropriate. This includes:

- A curriculum that increases student awareness of other cultures in preparation for a global society and workplace. On-going program review should ensure that the needs of employers and students are met for training relevant to the world.
- The expectation that students learn, practice, and demonstrate the institutional outcome/employability skill of Demonstrate cultural, social, and global awareness, prior to graduation.
- Academically relevant international, domestic, and virtual travel and exchange programs for students and staff.
- Contracted training for business and industry, with educators from other countries living locally or abroad.
